Overcoming the Challenge of Platelet Shortages

SESSION DETAILS

DESCRIPTION:

We have been experiencing a decline in our donor population over the last few years as well as an increase in the demand for products. I will present some data to show our stats for South Texas Blood and Tissue. To support the increased demand, strategies were developed to ensure the Health Care Providers and patients have the necessary blood products to manage their needs. We validated a couple of products: the cold stored platelets and the pool platelets to help with the increase demand.
