SCABBinar:

Adverse Reactions to Transfusion

Wednesday, April 14th, 2010

Presented by:

Marie P. Holub, MA, MT(ASCP)SBB

Description: This presentation reviews complications of transfusion including infectious and non-infectious adverse reactions and discusses how these reactions are recognized, investigated and reported. Appropriate patient treatment is described once the type of reaction has been identified.

Objectives:

1. Discuss noninfectious and infectious transfusion complications.
2. Explain how adverse transfusion reactions are recognized and investigated.
3. Recommend appropriate treatment for adverse transfusion reactions.
4. Describe how transfusion complications investigations are reported.

Level of difficulty: Intermediate

Intended Audience: Any health care professional providing blood components for transfusion or administering blood components.

PACE Contact Hours – 1

FL Continuing Education Credits - 1

Wednesday, April 14, 2010
