

SCABBinar:

The Status of the Blood Supply: Fulfilling Critical Needs

Tuesday – March 21, 2017

Presented by:

Kevin J. Land, MD
Vice President of Clinical Services
Blood Systems, Inc.

Description: Blood usage and blood collections have been in decline for several years as best practices in transfusion medicine have become widely adopted across the USA (e.g. Patient Blood Management). Many Hospitals and Blood Centers are experiencing mergers and acquisitions and often have fewer resources to care for the same or increased level of patient care. In this environment, how do we best support those patients needing more support than standard issue ABO/RH red cells and platelets? This presentation will outline some of these patient populations and steps being taken to ensure they continue to receive optimal care.

Level of difficulty: Intermediate

Intended Audience: Blood center staff, medical technologists, and physicians

Continuing Education Credits:

PACE Contact Hours - 1

FL Continuing Education Credits - 1

Tuesday – March 21, 2017
12:00 PM ET, 11:00 AM CT, 10:00 AM MT, 9:00 AM PT

Registration Fee:
