I am delighted that you made the decision to attend the 56th Annual Meeting & Exhibit Show of the South Central Association of Blood Banks! I am confident you will enjoy the meeting and come away with useful knowledge, new ideas and great friends. “Texas With a Twist” is this year’s theme, which represents both the town of Fort Worth and the evolving industry of blood banking.

Fort Worth is a place full of ironic twists, as reflected in its tagline of “Culture and Cowboys.” In this city, which is the 16th largest in the nation, you can literally see the “cows come home” with the daily cattle drives in the infamous Stockyards, or view works by Picasso and Matisse at the Kimbell Art Museum, all within minutes of our meeting hotel. You can two-step at Country and Western bars or dance at trendy nightclubs in close proximity to one another. The restaurants are numerous and diverse – take a brief walk outside the hotel and there are many to satisfy any appetite. No matter what you enjoy, you will find it in this lively Texas town with a Twist.

Speaking of what you enjoy, if it wasn’t blood banking, you would not be in this noble, and at times, challenging profession. The annual meeting provides “twists” from technical/scientific, to recruitment and collections, to administrative areas, and back to our distinguished award lectures. And, if your focus is IRL, you will benefit from the magnificent AIMS meeting immediately before SCABB. I am certain everyone will enjoy the Exhibit Show - be sure to stop in and see what’s new from our supportive vendors. Our program committees have worked very hard this year to organize a valuable program, so regardless if this is your first meeting or your 30th, and no matter what your focus, we have something for you.

Renewing old friendships and making new ones is a core strength of our association that is invaluable to your professional growth. In that vein (pun intended), be sure to attend the closing reception for networking opportunities. If that is not enough, our closing speaker and awards banquet is sure to inspire you with stories of selfless acts of kindness and connection.

I look forward to seeing you throughout the meeting.

Jeannie Gardner, RN
Oklahoma Blood Institute
56th President, SCABB

Welcome to the city of Cowboys and Culture! Your 2014 Local Arrangements Committee is pleased to put a “twist” on your Fort Worth, Texas stay. We have planned for you an exciting, educational, and memorable visit. Start your Annual Meeting with our Award Lecturers, and then enjoy the Membership Mixer. Help with creating an original piece of art as you make new contacts, touch base with friends, and relax in the historic Hilton Hotel...because you’ll be up early to take in the Trinity Trails at the annual Fun Run. After a day of educational sessions you will have to decide...Denim or Diamonds? The President’s Reception and Awards Banquet held at the Ashton Depot will have the perfect mix of the historical and the new, the cosmopolitan and the country. Be sure to polish your boots (or don your heels), we hear there will be dancing. After being inspired by our Closing Plenary Speaker, be sure to head to the Closing of the Exhibit Hall, where Texas Royalty will be on hand for a photo opportunity. Finish off your stay in Ft. Worth with a relaxing round of golf at the Ed Moore Golf Classic.

Don’t forget to work on your Texas Ribbon Mum during the entire meeting, a twist on the Texas Homecoming tradition.

*Welcome to Fort Worth! We are so glad ya’ll came to visit!*

2014 Local Arrangement Committee
SAVE-THE-DATE!

The Mirage ▲ June 1 - 4, 2015 ▲ Las Vegas, Nevada

The 2015 Joint Meeting of South Central Association of Blood Banks and the California Blood Bank Society is sure to capture your attention and stimulate your thinking. We invite you to take advantage of the opportunities to learn from some of the best in our field June 1 - 4, 2015 at The Mirage in Las Vegas, Nevada.

Network with other professionals in the industry, check out the latest products and services in the 2015 Joint Meeting Exhibit Hall and further your knowledge of current practices in educational sessions. Find it all at the 2015 SCABB/CBBS Joint Meeting & Exhibit Show!

MISSION STATEMENT

South Central Association of Blood Banks is a non-profit organization consisting of nine states (TX, AZ, CO, NM, NV, OK, AR, LA, MS). It is our mission to provide opportunities for members to enhance their abilities to deliver quality blood services.

CONTACT

For more information about South Central Association of Blood Banks, visit the website www.scabb.org or call 866-649-6550.
Merlyn H. Sayers, MBBCh, PhD
President, Chief Executive Officer, Carter BloodCare

Dr. Sayers is the president and chief executive officer of Carter BloodCare, the community independent blood program for Dallas Fort Worth and the surrounding 57 counties. Dr. Sayers serves on the faculty in the Department of Pathology at the University of Texas Southwestern Medical Center in Dallas. He previously served on the faculty in the Department of Medicine at the University of Washington in Seattle, during which time he was also Washington State Board of Health Vice Chairman. Previous positions have included Chairman of the Food and Drug Administration’s Blood Products Advisory Committee and President of America’s Blood Centers.

Dr. Sayers will welcome SCABB Annual Meeting guests to Ft. Worth on Sunday, March 30 at 3:30 pm. Dr. Sayers will also be speaking on Monday, March 31 from 8:45-10AM in the CEO’s Choice session – Texas C.

Kristin Kaufman
Founder & CEO, Alignment, Inc.

We’ll hold your seat at the SCABB Annual Meeting Closing Plenary featuring dynamic Kristin Kaufman! Kristin Kaufman is a dynamic business leader, successful entrepreneur, executive coach and published author.

If you think incidental meetings are incidental – think again. No matter how much we plan as executives, leaders and individuals, the random encounter opens up unforeseen opportunities. Lessons and perspectives on leadership, alignment and the power found in the present moment are discussed and made real through Kristin’s actual stories. Kristin’s book, Is This Seat Taken? Random Encounters That Change Your Life®, endorsed by notable leadership gurus such as Stephen Covey, Ken Blanchard, and Noel Tichy, will come alive on stage and you will be thinking about your everyday moments from a different perspective.

She brings to the room a passionate energy, wit, and Southern charm mixed with an old-fashioned work ethic and philosophy. It refreshes. It challenges. Yet, most importantly it leaves you thinking.

Tuesday, April 1, 3:15 pm

A special thank you to Carter Bloodcare for sponsoring Kristin as this year’s closing plenary speaker.
The Annual Business Meeting of South Central Association of Blood Banks will take place on Monday, March 31, 2014 at the Ft. Worth, Hilton in Ft. Worth Texas at 4:45pm. All Institutional Member voting delegates are asked to attend. Association business takes place at this meeting including election of officers, changes to bylaws, recognition of membership and more. All SCABB members are welcome to attend this Annual Business Meeting.

2014 SLATE OF NOMINEES

Executive Committee

President Elect
Sarah Jones, St. Luke’s Blood Bank, Houston, TX

Vice President
Christie Loe-Malone, National Sales Director, Rejuvesol at Citra Labs, LLC

Secretary
Stephanie Babin-Duplessis, Our Lady of the Lakes Regional Medical Center, Baton Rouge, LA

Treasurer
Garrick “Rick” Chatelain, The Blood Center, New Orleans, LA

District Directors

District I - 1 - TX
Robert Murfin, Children’s Medical Center, Dallas, TX

District III (AR, LA, MS)
Katrina Billingsley, LifeShare Blood Centers, Shreveport, LA

District at Large
Barbara Bryant, Blood Center of Wisconsin, Milwaukee, WI

Join our expert panel on March 31 at 3:15PM where they will offer answers to the questions that matter to you and your organization and give you new ideas you can implement tomorrow! 2014 “Expert Panel”: Kevin Land, MD, Dan Waxman, MD, Geralyn Meny, MD, Anne Winkler, MD, Dr. John Armitage.

Submit your questions to scabb@scabb.org with subject line: Ask the Experts
It is my pleasure to introduce your SCABB 57th President, Mr. Tom Choi. I have had the pleasure of knowing Tom for many years and am confident he will do an outstanding job in leading the association to the next level of success. Tom is currently the Vice President of Shared Service for Blood Systems Inc in Scottsdale, AZ. Prior to moving to the corporate headquarters for BSI, he was the Executive Director of the UBS Reno, NV blood center for many years. He has over 26 years of experience in the blood banking profession with a strong focus on strategic business planning, problem solving and change management, which will greatly assist him in our evolving industry.

Tom joined the SCABB board of directors in 2010 as a District Director and jumped right into the Vice Presidents position in 2012. You see, he has no fear! He has also been involved as a member and chair for several committees and has been an invited speaker for SCABB, CBBS and AABB. Tom likes a challenge. Another reason Tom has no fear is that he is a 5th Degree Black Belt in Tae Kwon Do, so don’t make him mad! He also enjoys golf, football and riding his custom Harley Fat Boy. Tom has a son and daughter and three lovely grandchildren. He is engaged to Sally Caglioti, whom many of you know as a long-term member and great supporter of SCABB as well as an awesome person. Sally tells me that they share three sweet dogs who rule the house, and Tom.

I am sure you can now see that SCABB is gaining a dynamic leader with great vision. Please join me in welcoming Tom Choi as your next president.

2014 FUN RUN

The annual Fun Run is scheduled for Monday, March 31 at 6:30 am. We will meet in the lobby at 6:00 am for transportation to start. Fort Worth’s Trinity Trails, which is just a short distance from the hotel, will be used for this event. As part of Texas with a Twist, the theme of this year’s meeting, a few obstacles are being added to the run this year. Don’t be scared, these obstacles are friendly, just like the folks here in Texas. From ladder run to hopscotch, a person of any fitness level will be able to enjoy this run.

Register at SCABB Registration Counter
2014 INDUSTRY WORKSHOPS

Saturday, March 29, 2014
12:00PM – 1:00PM
LUNCH PROVIDED BY GRIFOLS

Location: Continental
Presentation: Preventing Alloimmunization in the Chronically Transfused
Presented by: Grifols
Speaker: Mark Yazer, MD

Description: The presentation will identify individuals and associated red cell antigens at risk of adverse transfusion reactions. Alloimmunization associated with transfusions and pregnancy will be addressed as well as strategies such as extended typing, genotyping and registries in high risk populations.

Objectives:
1. Identify antigens at risk of causing alloimmunization.
2. Recall populations at risk for alloimmunization.
3. Explain the importance of pheno-typing and antigen avoidance in transfusion practices, and describe strategies which could reduce the risk in various patient groups.

Sunday, March 30, 2014
2:15PM – 3:15PM

Location: Continental
Presentation: Implementation of the Abbreviated Health History Questionnaire (aDHQ)
Presented by: Healthcare-ID
Speaker: Bart Block

Description: Gulf Coast Regional Blood Center discusses the implementation of the aDHQ at their center. Topics of discussion includes the steps taken, along with any obstacles, lessons learned, staff feedback, donor feedback, etc.

Objectives:
1. To provide other blood centers with an understanding of what it takes to successfully implement the abbreviated health history questionnaire.

Tuesday, April 1
7:30AM – 8:30AM
BREAKFAST WILL BE PROVIDED BY OCTAPHARMA

Octaplas™ - an alternative to fresh frozen plasma (FFP)
Presented by: Octapharma
Speaker: Andrea Neisser-Svae, MSc, PhD

Description: Octaplas™ an alternative to Fresh Frozen Plasma (FFP). This workshop will set the stage by providing the rationale for developing an S/D treated pooled plasma product. This will be followed by an Octaplas™ overview including manufacturing, biochemical profile, indications and appropriate usage, safety and tolerability profile and clinical study overview.

Objectives:
1. History of adverse events associated with transfusions and opportunities to maximize transfusion safety.
2. What are the effects of pooling plasma.

2014 Ed Moore GOLF CLASSIC

One of the last golf courses to be designed personally by the legendary Arnold Palmer, The Golf Club Fossil Creek opened for play in 1987. Our luscious rolling Tifway 419 Bermuda fairways are complimented with our fantastic conditioned TifEagle Bermuda greens. We offer an 18-hole Championship golf course, quality staff, and a Pro Shop that carries the latest in golf fashion and equipment. Whether it is for a single player, business or pleasure, charity or company tournament, we deliver the ultimate experience.

Named in memory of the late Ed Moore, an original “Bubba” and friend of South Central, the Ed Moore Golf Classic benefits the South Central Association of Blood Banks Foundation, which enhances the educational goals of the association through monetary support of current program offerings and member scholarships.

WHEN: April 2, 2014
WHERE: The Golf Club Fossil Creek
3401 Clubgate Drive
Fort Worth, TX 76137
TEE TIME: 8:30 AM

THANK YOU to our Presenting Sponsor: Blood Systems
Technical Scientific Award Lecturer
Scott Jones, PhD
Vice President of Scientific Affairs, Qualtex Laboratories

Dr. Jones received his undergraduate degree in Microbiology from Texas A&M University and a Doctorate in Microbiology from The University of Texas Health Science Center at San Antonio. He did his post Doctorate work at The Texas Center for Infectious Disease where he was the director of the TB-RFLP Laboratory. He has worked at the South Texas Blood & Tissue Center/QualTex Laboratories since 1999. He has expertise in blood screening of whole blood, source plasma and HCT/P donations. He has developed NAT assays for HIV-1, HCV, Parvo-B19 and HAV. He has authored and presented numerous oral and poster presentations at annual meetings for the South Central Association of Blood Banks, AABB and the Congress of International Society of Blood Transfusion. He is an active member of AABB and SCABB.

Administrative Award Lecturer
Joann Moulds, PhD, MT(ASCP)SBB
Scientific Director, Immunohematology Center, Grifols Diagnostic

Dr. Joann Moulds graduated from Arizona State University with a BS in medical technology. Joann completed her SBB training at Irwin Memorial Blood Bank and earned her PhD from the University of Texas Health Science Center. Prior to joining Grifols Diagnostics, Joann was the Director, Scientific Support Services at LifeShare. She is an active member of SCABB, AABB and ISBT and was instrumental in bringing AIMS to SCABB and chaired the AIMS committee for several years. Joann is well published, including 160 abstracts, and has been an invited speaker for many conferences. She is also a past SCABB Technical Scientific Lecturer award winner. Joann enjoys travel, gardening, wine tasting and playing with her dogs.

Karen Williams Memorial Lecturer
Endowed by Grifols
Evan Bloch, MD
Blood Systems Research Institute

Dr. Bloch is a native of South Africa and is currently an assistant clinical investigator with Blood Systems Research Institute and an adjunct clinical instructor at the Department of Laboratory medicine UCSE. Dr. Bloch has been very involved recently, in training in the safe clinical use of blood products in his home country; below is an excerpt from his CV:

“The majority of my teaching has been through both the drafting of content for and leading of international training workshops in transfusion medicine for clinicians and allied blood bank/laboratory personnel in Africa. Through collaboration with Safe Blood for Africa Foundation (SBFA), I co-lead two training workshops (Manzini, Swaziland and Kinshasa, Democratic Republic of Congo) on the clinical use of blood. These educational seminars, intended for clinicians and allied health professionals, comprise a series of interactive lectures and facilitated case discussions on core topics in transfusion medicine e.g. transfusion reactions, component use, approach to anemia etc. The content has been adapted to the local environment in view of resource limitations. More recently, I have assisted in teaching courses on manuscript-writing and Training in Clinical Research; both courses were attended by representatives of the regional transfusion services in Africa”.

President’s Awards Banquet

A twist of the old and the new, The Ashton Depot will be the location for this year’s President’s Reception and Awards Banquet. Its central location, historic architecture, grand scale and superb cuisine make it an architectural jewel and a perfect venue as South Central Association of Blood Banks celebrates the 2014 distinguished award winners. Each of the Awards presented reflects superior performance, service or commitment to the blood banking and transfusion medicine industry.

Industry Workshop
Presentation: Implementation of the Abbreviated Health History Questionnaire (aDHQ)

Presented by: Healthcare ID
Speaker: Bart Block, Director, Management Information Systems, Gulf Coast Regional Blood Center

Description: Gulf Coast Regional Blood Center discusses the implementation of the aDHQ at their center. Topics of discussion include the steps taken, along with any obstacles, lessons learned, staff feedback, donor feedback, etc.

Objectives: To provide other blood centers with an understanding of what it takes to successfully implement the abbreviated healthy history questionnaire.

3:30PM-6:30PM
Crystal Ballroom A
Opening Plenary
SCABB Annual Meeting Award Lectures

Technical/Scientific Award Lecturer
Speaker(s): Scott Jones, PhD
Vice President of Scientific Affairs
Qualtex Laboratories

Presentation: The History, Present and Future of Blood Transfusion

Description: NAT (Nucleic Acid Testing) of whole blood and source plasma donations has been in place in the United States since 1999. Originally screening for just HIV-1 and HCV RNA, we now screen for a variety of viruses using NAT. The assay your laboratory needs is not always commercially available so why not develop NAT assays in order to meet the testing needs of your customers? Key factors in developing NAT assays and performance of QualTex in-house developed assays will be discussed.

Objectives:
1. Understanding of the key factors in developing NAT assays.
2. Understanding of the performance characteristics of QualTex developed NAT assays.
3. Understanding of possible future NAT assays.

Administrative Award Lecturer
Speaker(s): Joann Moulds, PhD, MT(ASCP)SBB
Scientific Director, Immunohematology
Grifols Diagnostic

Presentation: Growing the Next Generation- Where Have All The Flowers Gone?

Description: Being a good administrator means ensuring that properly trained personnel are available to perform the work. Are we accomplishing this goal or failing miserably? This lecture will be an insightful look at how and where our next generation of leaders is coming from.

Objectives:
1. List the available types of training programs for laboratory personnel.
2. Project future needs for technical and managerial personnel.
3. Suggest a way that an administrator can help fill the gap.
Sunday, 3/30/2014  (continued)

3:30PM-6:30PM
Crystal Ballroom A

Karen Williams Memorial Lecture
Speaker(s): Evan Bloch, MD, MS
Associate Clinical Investigator
Assistant Adjunct Professor
Blood Systems Research Institute
University of California San Francisco

Endowed By: Grifols

Presentation: Advances in Blood Safety

Description: Overview of the past, present and anticipated future of blood banking.

Objectives:
1. Review the history of blood banking and how past lessons contributed to contemporary blood banking.
2. Describe both the seminal accomplishments as well as the setbacks in modern blood banking and how these have informed decision making and policy.
3. Extend a description of advances in blood safety to the future: that which is likely to occur vs. that which is not to be i.e. “the world of blood substitutes”.

CEO’s Choice
Speaker: Merlyn Sayers, MBCh, PhD
President and CEO
Carter BloodCare

Presentation: CEO’s Choice

Description: CEOs of two large blood Centers will discuss a favorite topic or project they have worked on.

Objectives:
Consider the role of language in defining a blood program’s missions, donor altruism and patient outcomes.

Speaker: J. Daniel Connor, MBA, CPA
President and CEO
Blood Systems, Inc.

Presentation: Lessons Learned from my Blood Banking Friends

Description: Share advice, anecdotes, life lessons and “aha moments” that helped guide others to lead a successful life invoking intellectual stimulation, humor and poignancy.

Objectives:
1. Share life lessons from blood banking experts.
2. Understand traits of successful individuals.
3. Help us learn to get along!

Motivating Collections
Presentation: Creative Methods to Motivate Collection Staff

Speaker(s): Linda Mazik, RN
Director, Collections
American Red Cross

Description: It can be difficult to motivate staff members who are seldom together in one place. We have found several methods to help our teams work together to improve production and increase compliance.

Objectives:
1. Using Recognition and Incentives to increase Platelet Products per Procedure.
2. Using games to increase compliance rates.
3. Putting the Face to the Donor.

Non hemolytic Reactions to Transfusion
Presentation: TACO / Trali
Speaker(s): Arthur Bracey, M.D.
Transfusion medical director
St. Luke’s Health
Description: Discussion of the most recent regulations regarding prevention of TACO/TRALI reactions in transfusion recipients, a description of each process and St. Luke’s hospital transfusion service experience with patients who show signs of each.
Objectives:
1. Learn current concepts on the pathophysiology of TRALI and TACO.
2. Become familiar with the impact of TRALI mitigation strategies.
3. Become familiar with the role of electronic databases in managing TRALI and TACO.

Presentation: Transfusion-Related Necrotizing Enterocolitis (TR-NEC) in Very Low Birth Weight Infants: Association with RBC Transfusion and Potential Underlying Pathophysiology
Speaker(s): Cassandra Josephson, MD
Associate Professor, Pathology and Pediatrics,
Emory University School of Medicine, Medical Director
CHOA Blood and Tissue Services, Atlanta GA
Emory University School of Medicine and
Children’s Healthcare of Atlanta
Description: Transfusion-related necrotizing enterocolitis (TR-NEC) has been defined as NEC, a co-morbidity experienced mainly by premature infants, within 48 hrs of a RBC transfusion. This lecture will discuss the epidemiology, and some potential underlying pathophysiological mechanisms that may lead this non-hemolytic reaction to transfusion.
Objectives:
1. Define and understand the epidemiology of TR-NEC.
2. Examine the relationship of irradiation of RBCs and development of TR-NEC.
3. Examine near-infrared spectroscopy (NIRS) in VLBW who have developed TR-NEC.

10:15AM - 11:45AM
Texas C
Disaster Planning
Presentation: Creating Calm in Chaos
Speaker(s): Angela M. Hudson, MT(ASCP)SBB
Chief, AF Blood Program
United States Air Force
Robert J. Curtis, Maj, BSC, USAF, MSHS, MT(ASCP)SBB
Deputy Director and QA, Air Force Blood Program
United States Air Force
CDR Roland L. Fahie MSC,MT(ASCP)SBB
Director Navy Blood Program
United States Navy
J. Peter R. Pelletier, MD
Medical Director Blood Services
United States Air Force
Description: A panel of professionals will relate real-life experiences about military disasters that have honed their skills in planning and working through chaotic events.
Objectives:
1. A panel of professionals will relate real-life experiences about military disasters that have honed their skills in planning and working through chaotic events.
2. By examining disaster preparedness in their respective experiences, the panel will impart knowledge to assist participants in refining their existing disaster plans.
3. The panel will impart knowledge to assist participants in creating a new plan or for events that had not been considered in their current plans.

Impact Project
Presentation: Managing your Collection Efforts in a Season of Changing Demand
Speaker(s): Ron Sheehan
Senior Manager, Business Optimization Group
Haemonetics
Speaker(s): Christie Cardenas
Assistant Director Donor Services
South Texas Blood & Tissue Center

PACE/CME Credits: 1.5 PACE/CME
Monday, 3/31/2014 (continued)

10:15AM - 11:45AM
Texas D

**Description:** This presentation will discuss current trends facing your blood center and how to prepare for imminent changes in the demand for blood. We will discuss key strategies that prepare us to respond to these changes with a plan to meet patient needs while controlling collection expenses. South Texas Blood & Tissue will discuss how their team worked with Haemonetics consultants to navigate changing demand and control costs within their collections program.

**Objectives:**
1. Discuss current trends facing blood centers.
2. Review how to prepare for imminent changes in demand for blood.
3. Examine navigating demands while controlling costs.

**Blood Utilization**

**Presentation:** The Seven Functions of a Patient Blood Management

**Speaker(s):** Kevin J. Land, MD
Sr Medical Director Field Operations
Blood Systems, Inc.

**Description:** The presentation will explore how a hospital can optimize its patient blood management program through the use of key functions that its steering committee should utilize.

**Objectives:**
1. Review how a hospital could work in a multidisciplinary fashion to drive optimal transfusion-related care.
2. List general evidence-based transfusion guidelines for red blood cells, platelets, and plasma transfusion.
3. Cite brief examples in which patient blood management principles are being used to optimize the management of data.

151-117-14
PACE/CME Credits: 1.5 PACE/CME

**Presentation:** Blood Management in a Major Health System - Data is important but structure gets the job done.

**Speaker(s):** Walter J. Linz, MD, MBA
Medical Director - Blood donor Center and Transfusion Service
Scott & White Medical Center

**Description:** This presentation will give the audience a perspective upon the prerequisite elements needed for the institution of a Patient Blood Management program in a complex health system and the structural changes in a health system that a patient blood management program facilitates.

**Objectives:**
1. Describe prerequisite elements in a system to consider a patient blood management program
2. Describe at least 3 interventions that resulted from institution of a patient blood management program.
3. List at least 3 effects on the system that resulted from a patient blood management program.

Volunteer Donor
Presentation: Volunteer Donor 2014
Speaker(s): Dan A. Waxman, MD
Executive Vice President and Chief Medical Officer
Indiana Blood Center

Description: In the last 20 years, we have learned the range of donors that can be safely recruited and collected. From limiting medication lists to actively recruiting high school donors and individuals with hemochromatosis, our donor pool has expanded at the same time our main group of donors are aging.

Today, we now have programs and strategies to draw specific products from donors based on their gender, size and blood group. This talk will explore the journey we have taken and takes a peek into what we might expect in the future.

Objectives:
1. Describe the traditional donor in the 1980s?
2. List 3 donor criteria changes that have been made in the last 20 years to enhance and enlarge the donor base.
3. Understand how new programs and technologies may change the way we recruit and collect donors in the future.

Presentation: Octaplas™ an alternative to Fresh Frozen Plasma (FFP)

Presented by: Octapharma

Speaker(s): Andrea Neisser-Svae, MSc, PhD, VP of Medical Affairs, Octapharma

Description: This presentation will set the stage with a very brief overview of fresh frozen plasma use in the US including indications, contraindications and a review of the current landscape of adverse events associated with this therapy. This will be followed by an Octaplas™ overview including manufacturing, biochemical profile, indications and appropriate usage, safety and tolerability profile and clinical study overview.

Objectives:
1. History of adverse events associated with transfusions and opportunities to maximize transfusion safety.
2. What are the effects of pooling plasma?

8:45 AM-10:00 AM
Continental
MD Roundtable
Presentation:

Speaker(s): Arthur Bracey, MD
Associate Chief of Pathology
St. Luke’s Episcopal Hospital

Chantal Harrison, MD
Professor of Pathology
UTHSCSA
Tuesday, 4/1/2014 (continued)

8:45AM-10:00AM
Continental

**Description:** The session consists of discussions moderated by Dr. Bracey and Dr. Harrison on hot topics in Transfusion Medicine chosen by the participants and the moderators. Different practices on how to address current issues are compared, giving rise to potential improvement in practices. Making contact with other medical directors in the area allows for future interactions and resources when issues occur.

**Objectives:**
1. Discuss issues of interest to medical directors of transfusion medicine.
2. Compare practices between transfusion medicine services in the area.
3. Network with other medical directors of transfusion medicine in the association.

**Cellular Therapy**

**Presentation:** Challenges in the Use of Hematopoietic Stem Cell Transplantation in Children with Non-Malignant Disorders

**Speaker(s):** Victor M Aquino, MD
Associate Professor of Pediatrics
UT Southwestern Medical Center Dallas

**Description:** Hematopoietic stem cell transplantation in children with non-malignancies present unique challenges to the blood bank in terms of stem cell processing and transfusion requirements in the face of changing blood types from the recipient to the donor. The presentation will provide an overview of the stem cell transplant process as well as management of selected issues in this patient population.

**Objectives:**
1. Overview of Hematologic Stem Cell Transplantation.
2. Management of Transplant Patients with Sickle Cell Anemia and Multiple Antibodies.

151-121-14
PACE/CME Credits: 1.5 PACE/CME

**Presentation:** The Growing Importance of Leukopheresis: An Overview

**Speaker:** Christina D. Anderson, RN, BSN, HP(ASCP)
Director, Clinical Apheresis
Carter BloodCare

**Description:** Leukocyte indications for apheresis have always played a role in our apheresis programs. However, that role fluctuates in importance depending upon numerous factors and as new evidence is obtained supporting its use changes. Leukocytes played an important part of our past, in development of blood cell separators for granulocyte collections. Today, there are many different indications for leukocytes within apheresis. On the collection side, we collect immature and mature leukocytes for medical purposes. On the therapeutic side, we remove leukocytes in patients with leukemia in blast crisis, and through photopheresis, we collect and then reinfuse photochemo activated leukocytes in patients with several different diseases to promote immune tolerance.

**Objectives:**
1. Review types of leukapheresis.
2. Highlight characteristics of specific leukocyte collections.
3. Review therapeutic leukapheresis procedures.

**Description:** Leukocyte indications for apheresis have always played a role in our apheresis programs. However, that role fluctuates in importance depending upon numerous factors and as new evidence is obtained supporting its use changes. Leukocyte.

**Army Blood Program**

*Presentation:* The Army Blood Program’s Efforts in Improving Blood Products and Blood Safety

*Speaker(s):* Richard Gonzales, MS, MT(ASCP)SBB, COL, MS  
Director, Army Blood Program / Blood Bank  
Consultant to the Surgeon General  
HP&S, Ancillary Health Services

*Description:* This presentation will provide the audience with a brief overview of the Army Blood Program in operation of its worldwide mission to provide the right blood products at the right time and place for patients and soldiers. The presentation will review the emerging doctrine and operational changes that occurred since 9/11 to the present day. As a result of field capability gaps, a broad array of research and development efforts is ongoing that will not only improve the safety of the Army blood supply, but will impact the US blood supply in the near future.

**Objectives:**
1. The audience will have a general understanding of the Army Blood Program capabilities and limitations.  
2. The audience will understand how 13 years of combat operations have changed how the Army Blood Program provides blood support.  
3. The audience will receive an overview of Army Research and Development efforts to improve the safety of blood products.

**Case Studies**

*Presentation:* Case Study - Heparan Sulfate

*Speaker(s):* Lisa Hensch, MD  
Resident, Department of Pathology  
University of Texas Medical Branch

*Description:* This presentation will describe a case of endogenous heparan sulfate production and associated lab abnormalities. Lab identification of possible heparan sulfate production will be described. Patients at risk for this pathologic entity and known literature will be reviewed.

**Objectives:**
1. Be aware of endogenous heparan sulfate as a clinical entity.  
2. Know the coagulation abnormalities associated with heparan sulfate production.  
3. Be able to identify patients at risk for this disorder.

**T/S**

*Speaker(s):* Gloria Mathur, BSc.Chem, MT(ASCP)SBB  
Manager Technical and Community Education  
Carter Blood Care

*Description:* A specimen from a pregnant woman was referred to the reference laboratory for antibody identification. No additional information or history was provided. This presentation will discuss the steps taken to resolve a complex antibody problem.

**Objectives:**
1. Determine the possible causes of pan reactivity on an antibody panel.  
2. Identify the resources available to resolve complex antibody cases.  
3. Recognize the steps to differentiate between antibody to a high prevalence antigen and multiple alloantibodies.

**Presentation:** Anti-U and Presentation: Anti-U and Double Lung Transplant

**Speaker(s):** Alice J. Chen, MD, PhD
Assoc. Medical Director, Blood Donor Program
St. Luke's Medical Center

**Description:** Case summary of a patient with an alloanti-U, listed for bilateral lung transplant. Brief review of serologic and molecular findings. Exploration of medical and logistical limitations in providing significant units of rare blood for unknown date of surgery in the setting of organ transplant. Presentation of key elements necessary to successfully orchestrate inter-departmental and inter-facility effort between Donor Center, Blood Bank, and Transplant Surgery.

**Objectives:**
1. Recognize challenges in managing rare blood inventory in planning for transplant surgery.
2. Emphasize importance of communication between relevant parties.
3. Briefly review serologic and molecular characteristics of anti-U.

**Presentation:** A Case of Anti-M

**Speaker(s):** Yasmine King MT(ASCP)SBB, MPH
Medical Technologist
Baylor Scott & White

**Description:** This presentation will describe a case of a patient with Anti-M exhibiting some of its classic characteristics.

**Objectives:**
1. Define the main characteristics of the MNS Blood Group System.
2. Describe a case of Anti M exhibiting some characteristics.
3. Illustrate the use of an Antibody Flowsheet in solving this case.

**151-124-14**

**PACE/CME Credits:** 1.5 PACE/CME

**Presentation:** Increased Revenues.. Thinking Outside the Box

**Speaker(s):** Michelle Stapleton, PhD
Senior Manager Operation Technical Support
Immucor

**Description:** The purpose of this presentation is to educate blood centers of potential revenue sources available from working with medical device manufacturers. Immucor Waukesha purchases platelets, plasma, serum and specialty blood draws. Immucor Norcross uses red cell antigen typed blood and red cell antibodies.

**Objectives:**
1. To educate blood centers or different sourcing needs manufacture.
2. Describe how blood products are used at Immucor Waukesha.
3. Describe how blood products are used at U.

**Presentation:** Further Manufacturing - A Resource for Increasing Revenue

**Speaker(s):** Tama Copeland, MT(ASCP)
Director, Reagent Technical Support
Immucor

**Description:** The purpose of this presentation is to educate blood centers of potential revenue sources available from working with medical device manufacturers such as Immucor. Immucor Waukesha purchases large quantities of platelets, plasma, serum and specialty blood draws. Immucor Norcross uses red cell antigen typed blood and red cell antibodies to type the antigens of the red cells and for product use.

**Objectives:**
1. To explain types of products that can be sold to manufacturers.
2. To educate blood centers on different sourcing needs.
3. To explain why manufactures need your help.

Are You Scanned?

Remember to have your badge scanned when entering each session to confirm your attendance for continuing education credits.

NOTE: Scanning will not be available after 5 minutes in to the start of each session.

Exhibit Hall Closing & Reception

Join us on Tuesday, April 1st in the Exhibit Hall from 4:30 pm to 6:30 pm to celebrate the close of another successful Annual Meeting & Exhibit Show!

Food, drinks and entertainment make for the perfect environment to grow relationships ignited at the conference and make those final connections with our vendor partners.

Don’t forget to take this last chance to register in the SCABB booth located at the balloon arch for our biggest give-a-way! Give-a-way’s will be announced at 5:00 pm and 6:00 pm.

*Must be present to win*

SCABB Booth!

Visit the SCABB booth for the latest and greatest on all the Association has to offer! Plus, get signed up for a chance to win one of our Exhibit Hall give-a-ways!

Give-a-way Schedule
- Monday, March 31
  - 1:00 pm
- Tuesday, April 1
  - 12:45 pm
  - 3:00 pm
  - 6:00 pm

You must be present to win*

SCABB booth is location in the balloon arch within the Exhibit Hall—you really can’t miss us!

Cyber Lounge

SCABB’s on-site business center exclusively for Annual Meeting attendees!

*Located in West Promenade*

Roche

South Central Association of Blood Banks
The Protégé/Mentor program is another way in which South Central fulfills its educational mission. It helps promote goodwill and professional collaboration among the association members, while exposing members to opportunities for Association service (special projects, abstract submissions, moderator duties, committee membership, board service, etc.)

**All members**: Please introduce yourself to the protégés as you see them throughout the meeting. They will be wearing special Protégé ribbons on their meeting badge.

**Congratulations to the 2013-2014 Graduating Protégé/Mentorship Class!**

David Gremillion has been awarded the 2014 Cornerstone Award
Nominated by: Stephanie Duplessis, Our Lady of the Lakes RMC, Baton Rouge, LA

David Gremillion has been a member of the South Central Association of Blood Banks for over 28 years. His contributions to SCABB over the years have definitely been monumental to the success of the Association. He is constantly striving to grow and better the organization and himself.

David began his career at Our Lady of the Lake Regional Medical Center in 1983 and he became a member of SCABB in 1985. Through the years he has served on numerous committees. He has been Committee Chair or Co-Chair for The Donor Recruitment & Collections Committee, The Technical/Scientific Committee, and the Administrative Committee. He lobbied tirelessly to lure the Association’s Annual Meeting to be held in Baton Rouge in 2013. He served as Local Arrangements Chair and organized many events such as the Fun Run, the Opening Plenary Speaker, Musicians and numerous others. David has served as District at Large Director for 2 years and Director of District III (AR, LA, MS) from 2008 to the present. He loves South Central and this position allows him to recruit new members with his passion for the organization, as well as use his unique southern charm to convince members to get more involved. He has nominated several individuals and institutions for the President’s Award of Merit and encourages others to submit nominations yearly.

Always striving for increased education, David has been a moderator and speaker at the Annual Meeting numerous times. He loves to share his knowledge with others and uses SCABB’s educational opportunities to springboard his own. He has organized and hosted several educational symposiums in the Louisiana area. This allows members and non-members the opportunity to attend educational events that may not be able to attend the SCABB Annual Meetings.

David’s passion for his ministry, years of volunteer service and continued commitment to South Central Association of Blood Banks is exactly what makes him a cornerstone of this organization.

Dustin Conover has been awarded the 2014 Rising Star Award
Nominated by: Jeannie Gardner, Oklahoma Blood Institute, Oklahoma City, OK

Dustin Conover started his SCABB journey five years ago as a way to gain additional knowledge about the industry and to network with like minded people. Little did he know that he would be drawn in by the SCABB allure! To immerse himself into the association he applied for a protégé position, was selected and gained important knowledge about the workings of SCABB and the industry. Once completing the program he joined the Membership Committee and gained good understanding of the challenges within a volunteer work group and strived to increase association membership. If you know Dustin you will understand that he takes his commitments seriously and strives to do his best. He does not shy away from a challenge and it is important for him to make a difference. So with that drive he then stepped up to serve on the board as District II Director and Chair for the Protégé Mentor Committee. As District Director he coordinated a successful regional workshop and as Chair of the Protégé Mentor Committee he is taking the program to an even higher level of prestige. If that is not enough, he also serves on the Administrative Committee and has been instrumental in helping to create a great administrative program for the Annual Meeting.

Dustin, of course, takes his role as Director of Fixed Site Operations for the Oklahoma Blood Institute just as seriously, with both passion and drive. He has become a true blood banker in a very short time and knows the importance of the work we do in making a difference in people’s lives through blood donation and transfusion medicine. Dustin reflects the essence of the Dr. Gottlieb Rising Star Award through his leadership and dedication to the association and industry.
Larry L. Trow Memorial Educational Award

The Larry L. Trow Memorial Educational Award is presented to an individual within the South Central Region who has significantly contributed to the promotion of education with relation to immunohematology.

Dr. Beth Hartwell has been awarded the 2014 Larry Trow Award

Nominated by: Clare Wong, Gulf Coast Regional Blood Center, Houston, TX

Dr. Hartwell’s passion for education has been evident throughout her career. After earning her undergraduate degrees at New Mexico State University in Las Cruces, New Mexico and completing training to obtain her MT(ASCP) and SBB certifications, Dr. Hartwell started her career as a medical technologist. She later went on to receive her medical degree from the University of Texas Medical School at Houston, completed a residency in Clinical Pathology, and is board certified in both Clinical Pathology and Blood Banking/Transfusion Medicine. Dr. Hartwell served as Medical Director of Pathology and Laboratory Services and Director of the Transfusion Service at Memorial Hermann Hospital/Children’s Memorial Hermann Hospital in the Texas Medical Center. Dr. Hartwell has extensive experience in the transfusion management of a variety of medical, surgical, and trauma patients, both adult and pediatric. She joined Gulf Coast Regional Blood Center in 2005 as medical director of The Blood Center, as well as medical director of the SBB program.

Dr. Hartwell is an avid educator who teaches blood banking with genuine enthusiasm. She teaches every day – just by interacting with everyone around her including physicians, pathology residents, blood bank fellows, students, staff in the transfusion service laboratory, as well as the public. As faculty of Baylor College of Medicine in Houston, Dr. Hartwell teaches and guides medical students, blood bank fellows, and pathology residents. “My primary teaching point – as well as what I try to emulate in what I do and say – is that the patient always comes first,” said Dr. Hartwell.

Dr. Hartwell has the ability of breaking down complicated concepts into more easily understandable points. Her educational style is to lead and nurture the student to have their own discoveries and to excel in their careers. She challenges the students towards excellence. All those who interact with Dr. Hartwell find her to be genuine, empathetic, resourceful and engaging. She is a role model for teachers and for anyone who wants to make blood banking their life’s work. With her help, SBB students of Gulf Coast School of Blood Bank Technology have been awarded scholarships for their research, published papers, and presented abstracts. She is an excellent lecturer with numerous awards from students at all levels as testimony of her excellence in education. One award is the University of Texas Medical Branch’s Jack B. Alperin Award for significant contributions to SBB education. Another award, from the University of Texas Medical School at Houston, is the John D. Freeman Outstanding Teacher Award that is presented to one faculty member by the graduating medical school class on the basis of teaching ability, interest in the students and contribution to educational goals. Dr. Hartwell is also a chapter contributor to Denise Harmening’s Modern Blood Banking and Transfusion Practices.

Dr. Hartwell actively promotes immunohematology education within the Association’s region by presenting lectures to audiences of various levels. Her SCABB presentations include Managing Recalls: The Blood Center versus The Transfusion Service and TRALI and Other Adverse Effects of Transfusion. Dr. Hartwell is the most amazing teacher, mentor, and champion of immunohematology who has the ability to teach individuals at various levels. She exemplifies the qualities of the passionate educator that best emulates the memory of Larry Trow.

President’s Award of Merit

The President’s Award of Merit consists of two awards; one for Outstanding Individual and the other for Outstanding Contribution for either the promotion of blood banking, public understanding or commitment to blood banking.

Outstanding Individual: This award is presented to an individual who has made a significant contribution to the blood resources of a blood collection facility, either by coordinating blood drives, donating large quantities of blood, or recruiting large numbers of blood donors over a long period of time.

Joann Fryling has been awarded the 2014 President’s Award of Merit for Outstanding Individual

Nominated by: Stephanie Duplessis, Our Lady of the Lakes RMC, Baton Rouge, LA

Joann Fryling has been a committed blood donor for over 40 years ago. Upon moving to Baton Rouge, she began donating whole blood at Our Lady of the Lake RMC and her church. Joann became the co-chair of the blood drive at Unitarian Church at the urging of the drive coordinator, Margie Belk. She became a lifelong donor and promoter of “Giving the Gift of Life”.

(continued on next page)
President's Award of Merit (continued from page 24)

Joann felt as if she was “Giving a Gift to the Community” by encouraging others to donate. She and Margie became life-long friends and put their heart and soul into making the blood drives successful. Every blood drive they would make homemade cookies and “Margie’s Famous Fudge” to give to every donor. They stood outside of the bus at every drive with a table for donors to sign-in and used this time to discuss blood donation with each individual. With Joann and Margie at the helm, the Unitarian Church has held 23 blood drives yielding 1,223 donations.

In 2005, both Joann and Margie became aware of the need for platelets and became faithful platelet donors with OLOL. Every year they donated 24 times, which is the maximum number of times allowed. Born 1928, Margie insisted that her age should not be a factor in her donation eligibility. That insistence produced a change in our donor acceptability policy that eliminated the upper age limit for donation. In 2009, Margie began a battle with breast cancer and was unable to donate again. Her friend Joann did everything she could to take more of the blood drive workload but Margie did her share right up until the very end. They hosted a blood drive on May 5, 2013 and Margie Belk lost her battle with cancer just a few weeks later. Joann has vowed to keep the legacy of Margie Belk alive and use her story to recruit new donors. The blood drive has been renamed “The Margie Belk Memorial Blood Drive”. Joann is more motivated than ever to donate and make the drive more successful. She has a new co-chair on board but knows it will never be quite the same.

Joanne is also on the Board of Directors for LSU’s Osher Lifelong Learning Institute (OLLI) classes. They focus on Lifelong Learning classes for the elderly. She promotes getting “out there” at any age. At the young age of 75 she and her husband Charlie take Swing, Ballroom and Zydeco dance classes weekly. She loves to dance but says donating platelets is just something she is compelled to do. Joann has donated 46 gallons of blood and platelets with OLOL over the last 3 years, including 81 whole blood donations and 155 apheresis platelets. For the upcoming December drive Joann will be making “Margie's Famous Fudge” using the recipe Margie gave to her.

President's Award of Merit

Outstanding Contributions: This award is presented to a group or financial contributor to the blood banking profession, which has shown spectacular long-or short-term results.

The Palo Pinto Hospital Auxiliary (“The Pink Ladies”) has been awarded the 2014 President’s Award of Merit for Outstanding Contributions

Nominated by: Joyce Kleist and Sandra Lundgren, Carter Blood-Care, Bedford, TX

Mineral Wells, Texas is historically best known for two things: The Baker Hotel, which drew politicians and Hollywood stars to its health-giving natural spring waters in the 1920s; and the Palo Pinto General Hospital Auxiliary. While the Baker Hotel has since passed into obscurity, the Auxiliary is still a vital part of the “health-giving” Mineral Wells community today. The Palo Pinto General Hospital Auxiliary was chartered in 1968, two years before Palo Pinto General was completed. Since the beginning, the Auxiliary has served the community both in and out of the hospital. Not only is it charged with supporting hospital staff, but it also takes very seriously the promise to provide other philanthropic support that benefits the total health care of the Palo Pinto Hospital District.

Chief among Auxiliary endeavors has been the important task of running the community blood drives in Mineral Wells since 1974, when mobile blood drives were first made available in the region. Originally, drives ran four times annually, but for the past eight years, the Auxiliary has operated six blood drives per year. The collective effort over the past 39 years has infused the community blood supply with more than 25,000 donations and an estimated 75,000 components of lifesaving blood. These donations are from an urban population today of only 14,000 residents. We applaud the Palo Pinto Hospital Auxiliary for their many years of supporting and organizing blood donation in their community.
Sol Haberman Scholarship Award

Sol Haberman Scholarship Award originated in 1970 to honor Sol Haberman for his pioneer work in blood group immunology. This award is given to a student of an approved or accredited SBB program anywhere within the United States.

Yeon Kim, MLS(SBB)
Correlation between Warm Reactive Autoantibodies and the Monocyte Monolayer Assay

Yeon Kim is the 2014 Sol Haberman Scholarship winner. Yeon will present her paper on Tuesday, April 1 at 8:45am at the Ft. Worth Hilton. As this year’s recipient Yeon receives a certificate of merit, $300.00 scholarship check, and complimentary full meeting registration to this year’s meeting. Yeon earned her SBB through the University of Texas Medical Branch SBB program. Yeon’s Abstract is included in this year’s Abstract Journal in the Final Program.

View Yeon’s paper in its entirety on www.scabb.org

Stay Connected & Network with Attendees using Bloodhound!

SCABB has taken networking at the 2014 AIM Symposium and 2014 Annual Meeting & Exhibit Show to a new level! We are excited to offer our attendees enhanced networking features at the touch of a button – made possible by a mobile device application called, bloodhound.

With bloodhound, AIMS & Annual Meeting attendees can scan each other’s badges to instantly capture contact information for a fellow attendee. What’s even better? It’s absolutely FREE!

How Do I Download Bloodhound?

Easy! Simply search using the keywords, “bloodhound”. Choose the app titled, Bloodhound Lead Management & Events. **NOTE:** if you are downloading this app to your iPad or iPad Mini, you may not get any search results. Make sure that your search setting (at the top menu bar) is changed to “iPhone Only” instead of “iPad Only”. Once you make that switch the app should pop up.

1. Install the app
2. Select “Create Account” and enter a few pieces of personal information (Name, Company, etc.)
3. To start scanning you will simply select the Menu button again at the top, left of the screen and select the “Leads” option.
4. Within the Lead screen you can select “Scan a Lead” from the bottom and you have 3 choices in which to scan – QR CODE, BUSINESS CARD or BARCODE. **Note:** We will be utilizing QR codes on badges at the AIM Symposium and Annual Meeting. You will need to select “QR CODE” in order to scan a fellow attendee’s badge.

If you have any questions feel free to visit the Annual Meeting registration desk or SCABB booth and we can show you how!
As Texas’ largest blood center, Carter BloodCare is the primary provider of blood components and transfusion services for approximately 200 healthcare facilities and over 50 counties in North, Central and East Texas. We are AABB-IRL, FACT, and ASHI accredited. In addition to the recruitment, collection, processing, storage and distribution of blood products, Carter BloodCare offers diversified services to clients throughout Texas and abroad.

**Diversified Services**

- Specialty Laboratories
- Reference and Transfusion Services
- Clinical Apheresis Services
- Hematopoietic Stem Cell Processing Laboratory
- Medical Services

ISP’s two-part quality system assures compliance with regulations on blood irradiation. (1) RAD-SURE® Indicators, with ISBT 128 bar coded lot numbers, attach to units of blood and provide positive, visual verifications of irradiation. (2) DOSE-MAP® validates and maps the performance of blood irradiators. RAD-SURE® UVA indicators are also available.

Act Fast Delivery, Inc. is a total logistics management company providing medically sensitive ground courier and Healthcare logistics management services across the United States.

Beckman Coulter, Inc. is the worldwide leader in donor blood typing systems. PK instruments have tested over 90% of the North American blood supply. The PK7300 offers the latest technology backed by trusted reliability and productivity.

Best Theratronics leads the industry in blood irradiation. Our Gammacell® line is the “Gold Standard” in countless clinics worldwide, and our latest in x-ray irradiation, the Raycell® Mk2, delivers superior performance and uniformity.

Bio-Rad Laboratories, a leading clinical diagnostics company, is focused on meeting the needs of laboratories, including Blood Banks and Blood Donor Centers. Bio-Rad delivers this by offering a broad portfolio of blood bank products.

Carter BloodCare is a not-for-profit, 501 (c)(3) organization that operates in 58 Texas Counties. Carter BloodCare provides a broad spectrum of services to healthcare facilities and other blood centers.

Computype leads the world in blood identification. Since the mid-1970’s, we have provided DIN label sets, replicators, printers and label stock, and intelligent print stations to blood banks in North America and beyond.

Creative Testing Solutions is the standard for proven and reliable blood and tissue testing. Experienced professionals, state-of-the-art equipment, and unwavering quality inspire confidence in our diverse client base. We are your solutions for all of your testing needs. Visit us at MyCTS.org.

Fenwal, A Fresenius Kabi Company is a global blood technology company dedicated to supporting transfusion medicine and cell therapies. We help ensure the availability, safety, and effectiveness of treatments that depend on blood – medicine’s most vital natural resource.

Fresenius Medical Care Inpatient Services provides hospitals with fully equipped apheresis program to include state of the art equipment, registered nurses, Medical Director Oversight. Over quarter century of experience, the largest therapeutic apheresis provider in the United States.

Genesis BPS supplies products for the collection, processing, storage and preparation of blood and other biological fluids. We can help you automate your Component Lab, Collections & Cell Processing! Learn more at www.GenesisBPS.com or call 866-71-BLOOD.

Grifols has a history of more than 70 years of commitment to transfusion medicine and patient safety. Our broad range of innovative diagnostic solutions plays a key role in ensuring the availability of safe and compatible blood products in markets worldwide. Active in all the different areas of transfusion safety, we provide products and systems for blood collection, typing, screening and traceability. Today, thousands of blood banks and transfusion services around the world trust in Grifols’ diagnostic products.

Haemonetics is a global healthcare company dedicated to providing innovative blood management solutions. Our products and consulting services deliver a suite of business solutions to help blood collectors, hospitals and patients.
