

SOUTH CENTRAL
Association of Blood Banks

SCABBinar: Case Studies

Wednesday, December 16, 2020 | 12:00 PM EST

REGISTER

Description: South Central Association of Blood Banks Institutional Members share their most interesting cases

Case # 1: BMT, We Have a Platelet Problem | Joel N. Kniep, MD

Obj: Discuss the different types of platelet refractoriness and transfusion options for platelet refractory patients

Description: Using a platelet transfusion case, we will discuss the different causes and types of platelet refractoriness.

Case # 2: Warm Auto or High Incidence Antigen? | Louis E. Kohler, MLS(ASCP)^{CM}

Obj: Techs will be able to evaluate, analyze and understand the risk involved in working with suspected warm autoantibody patients.

Description: High incidence antigens may present like a warm autoantibody. Should technologist include high incidence negative cells in warm autoantibody work ups?

Case # 3: Who's In Charge? | Richard R. Gammon, MD

Obj: Formulate how to address the ability to donate and remain compliant with the wishes of their healthcare surrogate and durable power of attorney

Description: This session will discuss the issues of concern include informed consent, control of the donor's decision-making process and IT issues faced trying to comply with the request. If you are involved with blood donors, you will want to hear this case!

Case # 4: Case study of a weak A_{subgroup}B in a Rural Hospital | Amelia Kirkland, MT(ASCP), SBB

Obj: Demonstrate the efficacy of using multiple platforms in solving serologic problems

Description: Will discuss how patients' blood groups can be less straight forward than they appear at first And when results are carefully assessed, discrepancies, with historical data, can be detected

Continuing Education Credits: South Central Association of Blood Banks is approved as a provider of continuing education programs in the clinical laboratory sciences by the ASCLS P.A.C.E. ® Program.
